

How to send a link on Skype

First you have to go to the website that you want to send, and go to the link on the top of the screen. Then highlight the link by holding right click and moving over it with your mouse. After that right click the highlighted link and press copy.

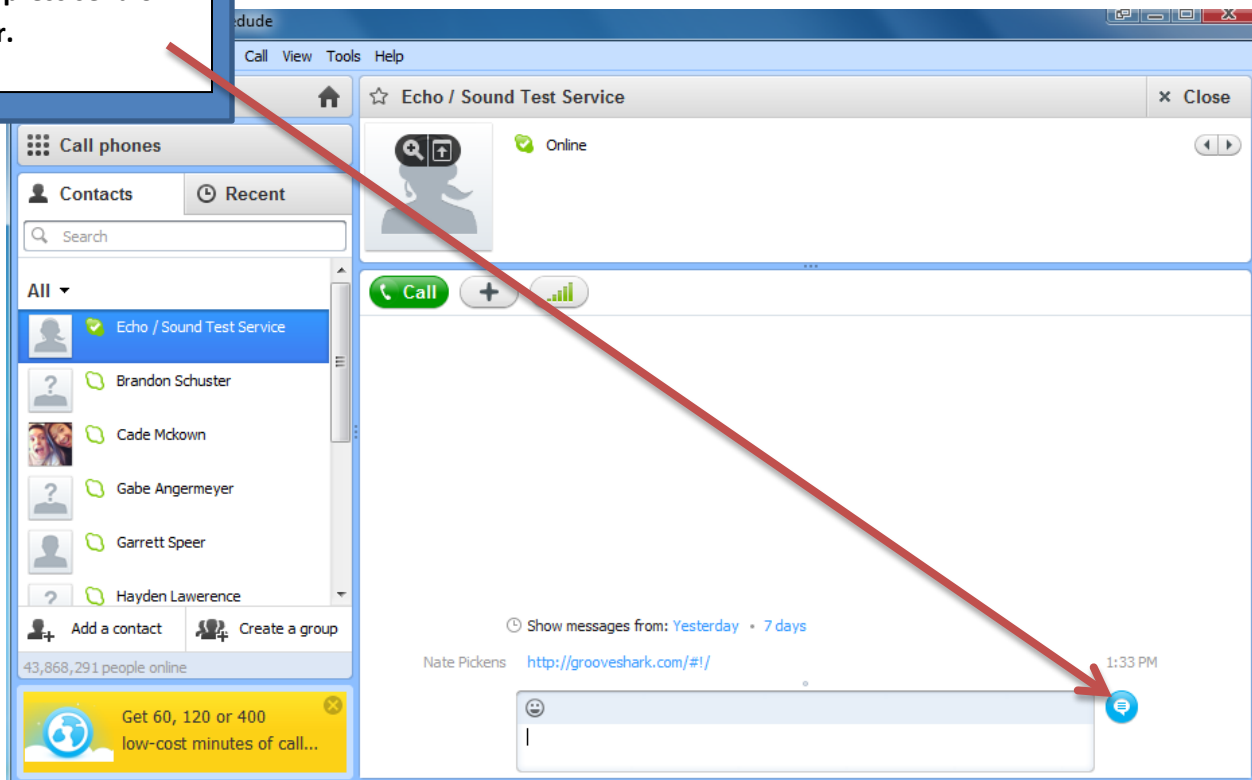

<http://grooves shark.com/#!/>

Then go to Skype and right click on the instant message box, and click paste.

Once the link is in the message box then press send or enter.

Now your friend can click on the link and it will take him/her to the website. 😊
